[RARC Hopewell ISS school link](#). 1st wind-solar-battery 'hybrid' plant, Oregon.....

Why do I need to register?

Guests -with severely limited access -just the tops of some posts- do not need to register. However, registration will give you features not available to guest users such as private areas like DDXG, and access to much more material for download, whole posts and replies to posts and add replies themselves. Other goodies include definable avatar images, private messaging, emailing of fellow users, selectable Styles of color and layout, usergroup subscription, enhanced search etc. It takes a moment to register so it is very much recommended you do so. **-Only a Callsign and an email needed-as already on QRZ.**

Yes, it really is free -as in beer.
